“The Voyager Encounters”

From 1979 to 1989 the Voyager 1 and 2 missions explored the wonders of the outer solar system. The Voyager Encounters is the definitive summary of results returned by the two spacecraft. It recaps the flybys of Jupiter, Saturn, Uranus and Neptune in one convenient, thorough documentary. To this day, the Voyager probes continue their exploration of the regions beyond the edge of our solar system. This Loch Ness Production is narrated by Patrick Stewart (general audiences: 35 minutes).

This program will be presented on the following Saturdays at 2:00 PM:

2/16, 2/23, 3/2, 3/9, 3/23, 3/30, 4/6, 4/13, 4/27

Planetarium schedule may change without notice to accommodate large groups, private functions, or for periodic maintenance projects. Please call 903-875-7596 to verify that shows are running before you visit.

ADMISSION IS \$2.00 PER PERSON

Planetarium will be closed for college events and holidays.
